THIS IS UNEVALUATED INFORMATION

1.

the roads which run in the Pecs, Saint Lorinc and Bata areas have been improved, widened and resurfaced.

50X1-HUM

2

a new hard-concrete surfaced, all weather road **#924** runs from Pecs westward to Barcs via Saint Lorinc and from Pecs eastward to Bata and proceeds northward toward Budapest. The same type of a hard-concrete surfaced, all weather road **#924** runs from Pecs northward through the mountains in the direction of Oroshaza. From Pecs the same type of a road runs southward toward the Yugoslavian border.

3.

These roads are now classed as superhighways in Hungary and are designed for heavy usage. They are over three lanes wide with shoulders running along both sides of the road. The roads are in very good condition and are well maintained.

50X1-HUM

4.

Before 1957 these roads were approximately two lanes wide and asphalt surfaced. The roads were in poor condition because of poor maintenance.

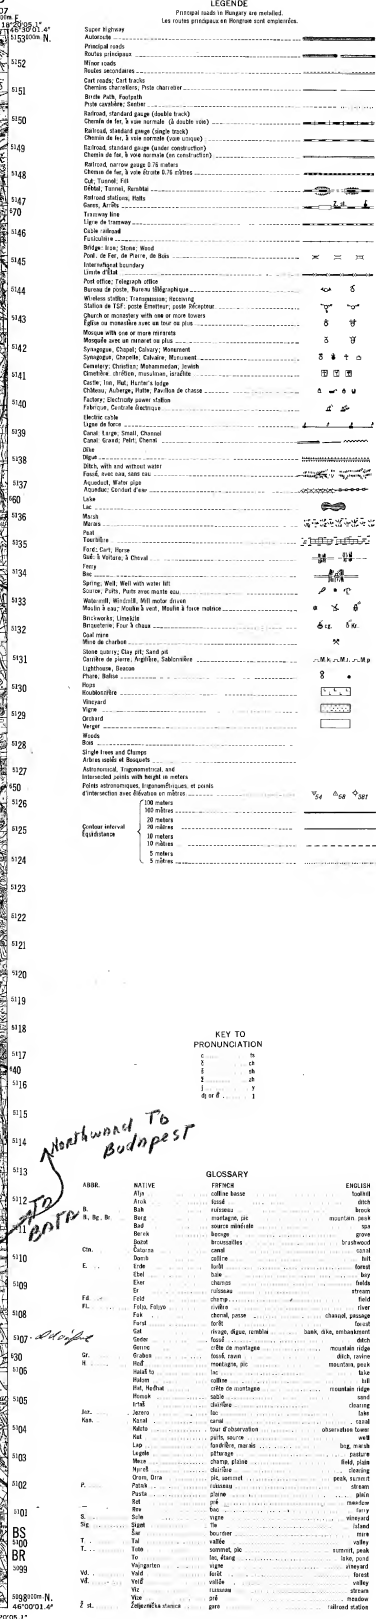

As of 1960-1961 these hard surfaced roads are heavily traversed by trucks due to the construction program in this area.
